Click on WAN Lookup the "eyeball" icon or click on the Windows Start button then Two Tongue Technology and WAN Lookup if it asks for **the location** of your **WAN Lookup file** it is located on the computer WAN Clients installed on in C:\RM-MultiStore\WAN Client\Store Name.

The WAN Lookup icon doesn't appear down near the Windows Start button?

If you are using **Windows 10** click on the Windows Start button select Two Tongue Technology and WAN Lookup right click and select Pin to taskbar.

Frequently Asked Questions – WAN Reports 5.7

The WAN Reports icon doesn't appear down near the Start button?

If you are using **Windows 10** click on the Windows Start button select Two Tongue Technology and WAN Reports right click and select Pin to taskbar.

Frequently Asked Questions – WAN Server 5.7

How do I import a Snapshot and transfer a License?

Click on the WAN Server icon then Help and Show Log File. To import a **Reset to Email** click Send/Receive on the WAN Server Control Screen. To import a **Reset to File** click Tools, Administration, Import Shop, Add File To Import and locate the **WAN Export file**. If WAN Client is installed on the same computer, the file is located in C:\RM-MultiStore\WAN Client\Store Name. Click Open then Import Specified Files once complete close all screens. On the WAN Server Control Screen select Tools, Administration click **(Unlicensed)** or the **X** cross underneath the word License then Transfer License.

Implement Outright Licenses

Click Exit and Yes on the WAN Server Control Screen to switch it off, right click on the Windows Start button select File Explorer/Open Windows Explorer then copy and paste the **License.dat** into the **C:\RM-Multistore\WAN Server folder**. On the Windows Start button select Two Tongue Technology and WAN Server, on the WAN Server Control screen go to Help, Show Log File then Tools, Administration click on the **X** cross underneath the word License then click Yes to process outstanding messages, a **✓** tick indicates that the outright license has been allocated.

How do I turn on SSL in the Internet Options

If your email host requires **SSL**, on the WAN Server Control Screen go to Help and Show Log File then back on the WAN Server Control Screen go to Tools, Administration click on Internet Options tick SSL next to Incoming Mail (POP) **change the Port Number when prompted** do the same for Outgoing Mail (SMTP) and click Test Email. To turn on **SMTP Authentication** tick Authenticating SMTP Server enter in the User Name and Password then click Test Email once Valid click Save and close out of all screens.

Items created still don't exist at the store?

 Click on WAN Server the “broken envelope” icon near the time then Tools and **Broadcast Audit Trail**. In the second dropdown list select Stock, items with a Sent status can be resent click in the Sel. column and then on Resend Item. To view items that have been created in the stores click on Pending/Cancelled/Failed and select Confirmed Broadcasts. Creates that have Failed will be listed under Errors/Mismatches with the reason they failed.

A Stock Transfer hasn't arrived at the store?

 Click on the WAN Server icon select Stock, Stock Delivery then click Transfer. Select how the stock was transferred and the store the transfer came from, ensure the Since Date includes that date click Include All, highlight the transfer and the details will be displayed below. If the **status is “Yes”** in the ST column the transfer has been sent, click on Cancel then the Audit Trail button. If the status is Sent click in the Sel. column then Resend Items, click on Pending/Cancelled/Failed then select Confirmed Broadcasts to display them. If the **status is “-”** the transfers older than 2 months and has been archived. The Net Purchases and Stock Ordering reports will confirm if the transfer is still outstanding. The Stock Linking screen displays Goods Received, on the WAN Server Control Screen select Stock, Linking, Goods Received the relevant store and date range, highlight the transaction and the details will appear below. If the **status is “No”** click Select to return to the Stock Delivery screen then click Commit to manually send out the stock transfer. If you get an error ‘failed looking up stock in other shop, barcode number and store name’ it means there is a **duplicate barcode** which needs to be addressed before the transfer can be sent. The receiving store can **merge the item** in RetailManager® and click Send/Receive. If the duplicate is a different item you can **edit the barcode** to another number, once the edit has been confirmed the Stock Transfer can be sent out manually or you can **manually unlink the item** creating a duplicate Master Item. See the section on Linking Stock, Staff, Customer or Suppliers for more information.

Change the WAN Server email address
